

Midiplus UP - Quick Reference

Full details: README.md / MidiplusUP-User-Guide.pdf - Starcycle + Claude

MODES

TRACK/IO Mixer - Vol/Pan

SEND Sends - send levels (SHIFT = 9-16)

PLUG-INS / F1-F8

Device - macros (encoders); Vol or macros (faders, FLIP)

PAN Gain-Stage - TRLVL device Gain/Pan (needs TRLVL on track!)

RETURNS Same modes, on Return tracks

B.T.A. Scene - clip launcher, wheel selects/launches

FLIP Swap faders/encoders Vol<->Pan/Macro

WHEEL (NEEDS SCROLL MODE)

(plain) Scrub, whole bars

SHIFT Shift loop by a bar

OPTION Halve/double loop length

CTRL Step to next/prev clip (click one first!) - or step devices in Device mode

SHIFT+CTRL Duplicate clip (right); configurable

ALT+CTRL Duplicate/delete track; configurable, can disable

ALT Adjust last-clicked GUI parameter

SHIFT+ALT Nudge selected item (click it first!)

OTHER COMBOS

SHIFT+PLUG-INS EQ Mode - jump to last EQ in chain

DRAW Cycle automation write mode

SHIFT+DRAW Toggle automation write arm

OPTION+DRAW Show/hide automation lanes

SHIFT+F1-F8 Store mixer snapshot

OPTION+F1-F8 Recall mixer snapshot

SMPTE/BEATS Toggle F1-F8 green state

SELECT x2 Fold/unfold group track

ENCODERS / FADERS

Push (Mixer) Center pan

Push (Device) Fine-turn / reset / open window - see Prefs

SHIFT+turn Stepped or fine adjust - see Prefs

SHIFT+HOME Add named cue marker ("Bar N")

ALT+F8, then F8 Fader position self-test

Setup reminders: Gain-Stage mode needs a device named exactly **TRLVL** on the track (Bitwig's "Tool" device works). Wheel combos need the hardware's wheel-mode selector on **SCROLL**. CTRL/SHIFT+ALT clip actions need a clip already **clicked/selected with the mouse** first - there's no button gesture that can select one from nothing.
